philipmoodie1989@hotmail.co.uk

Experienced warehouse operator with a background in the automotive industry. Technically proficient with good communication and organisational skills. Able to work collaboratively but also capable of carrying out workloads independently. I pay great attention to detail in my work and am looking to secure a long term role to further develop my digital skillset.

WORK EXPERIENCE

Antrim Tyre Company | September 2006 - April 2014 | 7 years 7 months | Antrim

Main duties in the workplace consisted of vehicle maintenance (tyre repair/replacement, exhaust/suspension/brake repair/replacement, vehicle servicing etc.)

Monitoring stock levels, contacting material distributors to place stock orders when necessary. Attentive customer service, providing the customer with clear and accurate descriptions of work needing carried out, prioritizing jobs to return vehicles to the customers in the quickest possible time frame while maintaining high level job quality. Calculating job prices and providing customers with receipts.

Schrader Electronics | Production Operator | April 2014 - July 2016 | 2 years 3 months | Antrim

Worked as part of a small team on a fast paced production line, outputting thousands of parts per shift. Handling sensitive materials such as small lithium batteries and PCB's. Reporting line errors to Machine operators to prevent line stoppages.

Sensata Technologies (Schrader Electronics) | Warehouse Operator | July 2016 - Present | 3 years 5 months | Antrim

Replenishment of material for production lines. Providing material availability for SMT lines to complete required shop orders. Receiving deliveries and storing goods while making sure items in physical and digital locations match. Preparation of finished goods pallets for shipping to customer. Occasional travel to another plant to collect parts in order to prevent line stoppage. Everyday use of Oracle EBS to perform part search or history checks for specific items or to print shop order reports etc. Using Microsoft Excel to sort and simplify stock reports to accurately check stock. Daily use of Outlook to check emails such as material requisitions from neighbouring units.
